

# BounceBack™ Capsules: For Active Lifestyles

We all want to be active and mobile, but life has a way of making it more difficult over the course of time. No matter what your age, overexertion can take a toll, and your body lets you know about it with muscle soreness and stiffness.

This soreness can cause people to become less mobile and unable to enjoy activities that were once a part of their daily life. You might assume this is something you simply have to live with. But with BounceBack capsules, you can significantly reduce muscle soreness and stiffness associated with physical activity and increase your active energy expenditure so you can live an active life!\*

BounceBack capsules contain a potent combination of select ingredients that reduce muscle soreness and stiffness due to overexertion or physical activity.\*

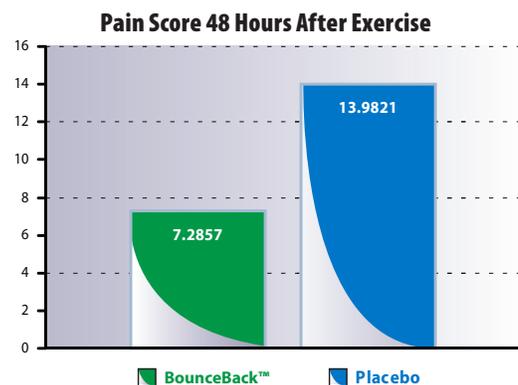

## Stay Active!

If your goal is to stay mobile and moving, BounceBack capsules are for you. Formulated especially for those with a moderately active lifestyle, BounceBack capsules are packed with proprietary plant technologies that have been clinically shown to:

- Reduce muscle soreness from exercise or overexertion\*
- Help ease the pain from delayed onset muscle soreness (DOMS)\*
- Provide optimal joint support\*
- Provide antioxidant support\*

BounceBack capsules are supported by a recent double-blind, placebo-controlled, crossover pilot study.\*\*

As shown below, clinical study participants who took BounceBack capsules found their muscle soreness reduced by half that of the placebo group—a significant difference!\*

## How Do BounceBack Capsules Work?

Revolutionary BounceBack capsules contain natural ingredients that work together to reduce muscle soreness associated with physical activity and to increase energy expenditure when taken over time.\*

**Proprietary Protease Blend** (*Aspergillus oryzae* and *Aspergillus melleus*)—a proteolytic enzyme that reduces pain and swelling associated with physical activity.\*

**Phytosterols** from unsaponifiable avocado and soy oil extract—plant sterols that help to support optimal joint health.\* Contains beta-sitosterol, campesterol and stigmasterol in a specific ratio designed to prevent pain issues associated with overexertion.\*

**Turmeric rhizome (95% Curcumin)**—a member of the ginger family that helps reduce soreness and stiffness due to overexertion or physical activity.\* BounceBack capsules provide over 420 mg of high-quality turmeric (standardized to 400 mg curcuminoids) per serving.

**Bromelain**—a proteolytic enzyme extracted from the root and stem of the pineapple that reduces pain and swelling associated with physical activity.\*

**Resveratrol**—a phytoalexin from Japanese knotweed, red grape skins and other berries. Known for its antioxidant effects, resveratrol also has the synergistic effect of helping the other ingredients work together more efficaciously.\*

BounceBack capsules are one more example of the natural, excellent product quality Mannatech delivers—in every single bottle.

### Did You Know?

You'd have to eat more than eight bowls of your favorite Indian curry to get the amount of curcumin you get from just one serving of BounceBack!
