Omega-3 with vitamin D₃
The best of the sun and the sea

Mannatech takes eco-friendly, sustainably-sourced fish oil and puts it through a proprietary, two step molecular distillation process. Not only does this eliminate contaminates and ensure pharmaceutical-grade purity, but it also helps to remove any shy after taste.

An ultra-pure, high potency, high concentrated dose of EPA/DHA, that rivals others on the market. A 830 IU of vitamin D₃ per serving.

Benefits:

- May help maintain healthy cardiovascular health
- May help maintain a healthy heart
- May help maintain healthy blood lipid levels
- May help maintain healthy triglyceride levels
- May help maintain healthy brain function in adults
- DHA intake in pregnant and lactating women may support visual and cognitive development in the fetus and nursing infant
- DHA intake in pregnant and lactating women may support normal development and functioning of the brain of the fetus and nursing infant
- Contributes to the maintenance of healthy bones
- Vitamin D enhances calcium absorption for strong bones and teeth
- Contains omega-3 fatty acids for immune support
- Vitamin D is a fat-soluble vitamin that can be better absorbed when taken or combined with another fat or oil-based food or supplement, such as omega-3 fatty acids from fish oil
