

TAKE THESE SIMPLE STEPS TO RE:VIVE YOUR BUSINESS ... BEFORE TIME RUNS OUT

revive /ri-vahyv/ *verb* 1 to restore to life 2 to bring back 3 to set in motion 4 to activate

From now until February 12, 2016,
we will be focusing on helping you Re:Vive, or reactivate, Associates who could affect the future success of your business. After that date, all inactive records will be removed from the current data system for faster, real-time reporting and business processing.

So take some time now to review your current database of Associates and pinpoint those who might be affected by this change (**anyone who has not ordered since December 31, 2013**). Talk with people who have been loyal product users in the past, and share with them all the new initiatives and programs they may have missed out on since their last order. There's a lot going on at Mannatech that they might not be aware of.

Let these Associates who are in danger of being removed from the database know that if they place a one-time order or start an Automatic Order of 100 PPV or more, it will not only reactivate their account, but they will receive a special thank you gift of **Generation Uth™ Rejuvenation Crème samples**, a **product information card** and a **welcome back letter** outlining all the exciting **new Mannatech initiatives along with an invitation to MannaFest 2016!**
(Note: Orders less than 100 PPV will keep the account active, but will not generate the free samples.)

For help in learning how to download and save your database while maximizing your organization, refer to the following:
