

# Advanced Ambrotose®

## Improve Your Health with an Advanced Blend of Saccharides

Combining the power of classic Ambrotose complex (including mannose from aloe vera) and nutrient-rich wakame (a special type of brown seaweed), **Advanced Ambrotose** products are based on our Real Food Technology solutions. They are an important part of our Integrative Health approach, which addresses the whole person—mind, body and spirit. This powerful supplement provides you with one of the most potent and healthy mixes of glyconutrients available to support immune function.\*

Mannatech's Advanced Ambrotose products are based on a breakthrough formula that offers an advanced blend of saccharides. They combine arabinogalactan, saccharides from aloe and Manapol® powder, which provides a more pure form of aloe vera gel powder that has a higher molecular weight than others and is also richer in mannose, an important glyconutrient.

Bulk powder and capsules:

Support **immune system function**.\*

Support **organ function**.\*

Support **proper gland function**.\*

# Advanced Ambrotose®

## How Is It Different from Classic Ambrotose Complex?

Advanced Ambrotose products also include fucoidan-rich *Undaria pinnatifida*, or wakame, a brown seaweed harvested from the clear waters off the coasts of Tasmania and Patagonia, for more fucoidans per serving than any other Mannatech product. What are fucoidans? Important polysaccharides that help support the immune system.\*
