

Nutrition the way your body wants it.

Ready for a Shocker?

Most nutritional solutions today are falling way short of what your body actually considers to be "good nutrition." Sure, the label touts all the popular vitamins, minerals and other trendy nutrients at levels that seem impressive on the surface. But your body isn't fooled. Your body is complex, and it's looking for more than just a combination of synthetic nutrients to feel its best.

Your body wants nutrition from real food sources.

Make Your Body Happy

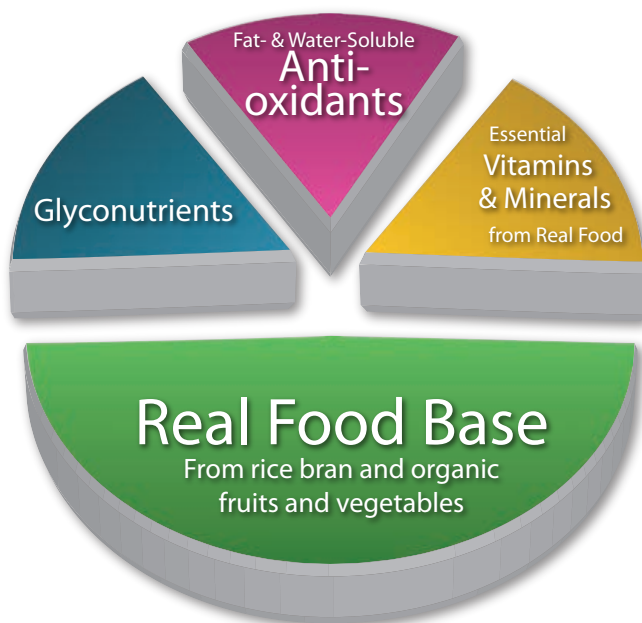

Mannatech recognizes the importance of nutrients from nature. We introduced Real Food Technology® solutions to take a different approach to nutritional supplementation. Simply put, we use science not to "create" nutrition, but rather to "capture" nutrition ... from nature, of course.

And as far as your body is concerned, this approach makes all the difference.

Introducing NutriVerus™ Powder

NutriVerus powder delivers the nutrition your body needs, the way your body wants it. This completely unique supplement combines natural, food-sourced vitamins, minerals, glyconutrients and fat- and water-soluble antioxidants in a nutrient-dense real-food base of stabilized rice bran and organic fruits and vegetables. The result? Energy-boosting, immune system-supporting nutrition in an environment just right for nutritional synergies to occur, increasing the potential interaction of the individual nutrients.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

The “**NutriVerus**” name is derived from two words: “nutrition” and the Latin word “*verus*,” which means real or true. **NutriVerus is real nutrition.**

NutriVerus powder is loaded with benefits that will noticeably influence your overall health and well-being.* Here's what NutriVerus powder can do for you:

- **Helps you maintain your energy***
- **Bolsters your immune system***
- **Supports brain function***
- **Helps protect your cardiovascular system***
- **Supports healthy digestion***
- **Supports cell-to-cell communication***

When Did Nutrition Get So Simple?

The science that goes into NutriVerus powder may be advanced, but the product is designed to simplify nutrition in ways you've never seen before:

1. **Easy-to-Use:** Mix one serving twice a day in your food or drink. NutriVerus powder has a neutral flavor, so you can add it to just about anything.
2. **Affordable:** Most people have to buy at least three different supplements to even approach the variety of nutrients found in NutriVerus powder, and they still don't get close.
3. **Flexible and Convenient:** The unique delivery method and natural, food-sourced nutrients make NutriVerus powder the best choice for children and adults alike.†

Did You Know?

Stabilized rice bran (SRB) is an emerging superfood that captures the most nutritious parts of the kernel that are otherwise stripped away during the milling process. The SRB alone in NutriVerus powder contains a wide array of fatty acids, phytosterols, glyconutrients, fibers and many other nutrients.

Manapol®, the superior aloe vera gel used in NutriVerus powder, is exclusive to Mannatech and at the heart of our glyconutrient breakthroughs. Grown in the mineral-rich volcanic soil of Costa Rica, Manapol is created from the stabilized key components of aloe vera gel (*acemannan*), which have been shown to provide the most benefit.

The hydroponic technology used to standardize the plant-sourced minerals in NutriVerus powder is the first and only of its kind. This process makes it possible to not only include food-sourced nutrients in the product, but also to verify their amounts.

Ready to finally give your body what it wants? Ask the person who gave you this information for details on how to get started on **NutriVerus powder**.
